01 / HYDRAULIC BOAT HANDLING

U-Go 6.5T

Navalift brings together experience in boat construction, yard operations, customer support and metalworking. The team works with clients to develop equipment that addresses practical handling and storage challenges.

Hydraulic boat handling trailer

For moving boats on land, launching and hauling out. The hydraulic system combines double-acting operation with remote control and a high lifting height.

- 6,500 kg payload capacity
- For boats up to 33 ft
- 23-inch wheels with inflated tyres
- Braking system referenced to European Regulation 2015/68
- Biodegradable hydraulic oil meeting ISO 15380

Contact Navalift to confirm the configuration for your boats and operating environment.

Lightweight boat supports

Adjustable props and aluminium keel blocks provide practical support options for sailboats and motorboats, with lightweight equipment designed for everyday handling.

Single Boat

Adjustable marine props

Non-slip contact surfaces at the foot and head, adjustable height and durable, recyclable material.

S version / 2 t safe working load
93-150 cm height / 6.65 kg

L version / 1.5 t safe working load
153-210 cm height / 7.65 kg

Keelblock 600 and 900

Aluminium keel supports

Stackable supports for motorboats, available in two heights to suit different yard setups.

600 / 60 cm high / 3.10 kg
900 / 90 cm high / 4.30 kg
Both models / 5 t payload

Boat storage solutions

Automatik

AUTOMATIC BOAT STORAGE CRADLE

A boat storage cradle for sailing yachts and motorboats. Its support stands rise automatically, with no manual lifting effort, making setup easier for yard teams.

Automatic raising. No manual lifting effort.

Available in 20T and 30T versions.

Coming soon

Mid Block 3T

HALF CRADLE FOR MOTORBOATS

A half cradle for motorboats with four height-adjustable pads. The lightweight, stackable design weighs less than 20 kg and is compatible with traditional hydraulic cradles.

Mobile mast support

ADJUSTABLE HEIGHT

An upcoming support for boat masts. The illustrated design combines a V-shaped cradle, a height-adjustable column and castor wheels for positioning in the yard.
